Software Engineer FULL STACK

Location – Remote

About us

Automated Analytics combines cutting-edge artificial intelligence with marketing, recruitment, and analysis software.

Our clients are provided with a platform to automate their sales and recruitment campaign management and unlock the power of accurate and fast business intelligence through insight and analysis.
We are looking for candidates to join our team and help empower clients to understand their performance, inspire improved customer and candidate experience, and enhance profitability.

Automated Analytics is proud to offer a positive work environment that offers opportunities for growth and recognises and rewards performance.
Employee health and morale are integral to productivity and satisfaction, so we curate a workplace that promotes a meaningful work-life balance and employee satisfaction.
We believe there is no binary choice between delivering the best results and focusing on the well-being of our staff. Our colleagues' contributions are valued and are part of a team with a genuinely collaborative approach.

Employee experience is a fundamental requirement of a forward-thinking business that seeks to attract the brightest talent.
If you think you deserve to be successful and have the skills and mindset to thrive at Automated Analytics, we look forward to your application.
